Terminology for Operators (Not For Comment)

- Capability: **The ability to achieve a desired effect under specified standards and conditions through combinations of means and ways to perform a set of tasks.**
- Task: **An action or activity (derived from an analysis of the mission and concept of operations) assigned to an individual or organization to provide a capability.**
- Standard: **Quantitative or qualitative measures for [specifying] the levels of performance of a task.**
- Condition: **Variable of the operational environment including scenario that affects task performance.**
- CONOPS: **The overall picture and broad flow of tasks assigned to subordinates/supporting entities within a plan by which a commander maps capabilities to effects to accomplish the mission for a specific scenario.**
- Effect: **A change to a condition, behavior, or degree of freedom.**
- Endstate: **The set of conditions, behaviors, and freedoms that defines achievement of the commander's mission.**
- Mission: **The purpose (objectives and endstate) and tasks assigned to a commander.**
- Measure: **Provides the basis for describing varying levels of task performance.**
